

Firefox browser window showing a chat interface. The address bar contains `https://brainworm.surgery/#p697772`. The chat area displays a series of messages from users including `Anonymous`, `opna`, `Haskellslut`, and `Anonymous`. A microphone icon and a volume slider are visible at the top of the chat area. The browser's address bar shows `https://brainworm.surgery/#p697772`. The chat messages are as follows:

- `Anonymous` 1m 697772: [Microphone icon]
- `opna` (You) 36s 697773: Hmm I don't think this voice is very good
- `Anonymous` 40s 697774: u can just use #change#
- `Haskellslut` !YMUa9BeKZ. 33s 697775: `>>697757` (You) depends on a bunch of things, if you can figure out a way to get credentials, you could switch to a different vt
- `Haskellslut` !YMUa9BeKZ. 12s 697776: if you want to basically take a hammer to it, boot off live media and chroot
- `Haskellslut` !YMUa9BeKZ. now 697777: you might be even able to like edit the shadow file or something
- `Anonymous` now 697778: ah, yeah if you mount the disk from a live distro you can read it outside of any extant access controls, provided it's not encrypted
- `Anonymous` now 697779: its at a failly androgynous point
- `Anonymous` now 697780: oh, that's at least good to hear
- `Anonymous` now 697781: th
